Hedgerow Farm's California Central Valley Pollinator Conservation Seed Mix

The Xerces Society, UC Davis, UC Berkeley, the NRCS, and Hedgerow Farms have collaborated to create this native pollinator mix specifically designed to provide foraging resources for a diversity of pollinators.

- 9 species of California native wildflowers
- Provides nectar and pollen throughout the growing season
- Includes annuals that reseed year to year and perennials
- Includes species that are attractive to beneficial insects
- Formulated to be seeded in areas along agricultural production fields
- Improves visitation of pollinators in agricultural production fields adjacent to plantings
- Appropriate for hedgerow plantings
- Seeding rate is 8.5 bulk lbs/acre

To Order: This mix is available through our webstore. For orders exceeding 10 pounds please call or email to place an order. We also have articles we can share that have recommendations on site preparation, planting, and maintenance on our website under "Pollinator Resources". We can ship via UPS and we have a $100 minimum order. Please note that this year's mix includes *Lupinus succulentus*, Arroyo lupine, as a replacement for *Lupinus microcarpus ssp. densiflorus*, golden lupine. We hope to have golden lupine available for next year's mix.

California Central Valley Pollinator Conservation Seed Mix:

Botanical Name	Common Name	Bulk lbs/acre	Percent of Mix by Weight	Target Live Seeds/ft^2	Percent of Mix by Seed Count
Clarkia unguiculata	*elegant clarkia*	0.5	5.9%	12.75	30.0%
Clarkia willionsonii	*Fort Miller clarkia*	0.3	3.5%	7.65	18.0%
